

CLAIMS

What Is Claimed Is:

A. A disposable floor mounted pad for placement adjacent to a urinal for absorbing fluid, said pad comprising:

a pad body including a first layer of fluid absorbing material attached to a second layer of fluid impervious material;

5 a quantity of adhesive material attached to said second layer opposite said first layer, whereby said pad body may be adhesively secured to the floor in front of a urinal.

2. A disposable floor mounted pad according to claim 1, wherein said pad body defines a generally trapezoidal shape.

10 3. A disposable floor mounted pad according to claim 1, wherein said first layer is chemically treated with an anti-microbial agent.

15 4. A disposable floor mounted pad according to claim 1, wherein said first layer is chemically treated with a fragrance agent.

5. A disposable floor mounted pad for placement adjacent to a urinal for absorbing fluid, said pad comprising:

20 a pad body including a first layer of fluid absorbing material and a second layer of fluid impervious material disposed below said first layer and forming a bottom surface;

said pad body defining a generally trapezoidal shape;

25 a disposal container connected to said pad body, said disposal container deployable from a concealed configuration to a deployed configuration wherein said pad body is enveloped;

said bottom surface including a quantity of adhesive

material attached whereby said pad body may be adhesively secured to the floor in front of a urinal.

30

6. A disposable floor mounted pad according to claim 5, further including means for deploying said disposal container.

7. A disposable floor mounted pad according to claim 5,  
35 wherein said means for deploying includes a plurality of cords each cord connected on one end to said disposal container and connected on an opposite end to a removal member, whereby applying a force to said removal member causes said disposal container to deploy thereby enveloping said pad.

40

8. A disposable floor mounted pad for placement adjacent to a wall mounted urinal for absorbing fluid, said pad comprising:

a pad body including a first layer of fluid absorbing  
45 material and a second layer of fluid impervious material disposed vertically below said first layer and forming a bottom surface;

said first layer including an anti-microbial agent for maintaining said pad biologically sanitary;

said first layer including an odor eliminating agent for  
50 maintaining said pad free of unpleasant odor;

said pad body having a generally trapezoidal shape defining a substantially linear front edge;

said bottom surface including a quantity of adhesive material attached whereby said pad body may be adhesively secured  
55 to the floor below and in front of a urinal, and whereby installation of the pad in proper position is facilitated by placement of said linear front edge in abutting relation with the wall upon which the urinal is mounted.

60 9. A disposable floor mounted pad according to claim 8,

further including a disposal container connected to said pad body, said disposal container deployable from a concealed configuration to a deployed configuration wherein said pad body is enveloped.

65

10. A disposable floor mounted pad according to claim 8,  
wherein said pad body has:

a longitudinal length of approximately 18 inches; and a rear edge, opposite said front edge, having a length of approximately 11 inches.
